As said in the experimental analysis, the price and demand of an NFT is highly linked to its collection. So, we have found out the top collections based on different factors like floor price, volume, Market cap etc.

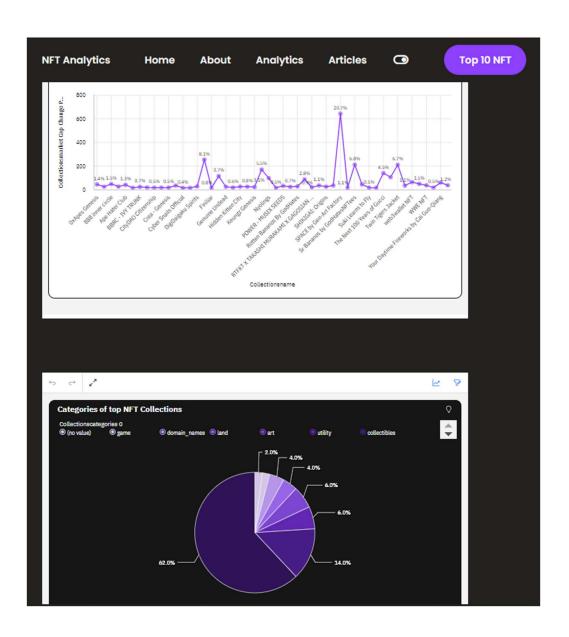

Floor Price

What is it:

In the NFT space, the floor price is the lowest-priced NFT within an NFT project. Buying the floor is considered a good starter strategy since it's an approachable entry point for new people joining an NFT project.

Why is it important?

The floor price is a good metric for evaluating how well an NFT project is being received by the community. As demand increases, the floor price will increase. So if you buy the cheapest NFT in a collection with the expectation that it will become more popular, you can then resell the NFT when the floor price is higher. A good goal is to find a project that balances high value and accessibility. Although projects with higher floor prices are worth more, they are more difficult for smaller traders to afford.

TOP 10 NFT'S			
NFT Rank	NFT's Name	NFT's Image	NFT's Price(\$)
1	CryptoPunk #9998		\$52,95,07,191.00
2	Meebit #4092		\$4,83,34,536.39
3	Meebit #6014	***	\$4,88,54,898.37
4	Bag #2579	E. E. C.	\$4,78,78,242.90
5	Meebit #13824		\$5,06,20,039.29
6	Bag #3834	E.	\$4,57,71,529.10
7	Bag #396	Gr. Exam	\$4,56,45,414.59
8	Meebit #13292	To the second	\$4,83,05,030.82
